## REACH declaration

Dear customer,

REACH is the new European Union regulation for the production and use of chemical substances, which entered into force on 01/07/2007. It deals with the registration, evaluation, authorisation and restriction of chemicals.

WEBER-HYDRAULIK GmbH, all 100% subsidiaries as well as all joint ventures controlled by the WEBER-HYDRAULIK Group are downstream users in the supply chain within the meaning of REACH. We neither manufacture nor import substances or preparations affected by REACH. Thus, we are not subject to compulsory registration and do not have to create safety data sheets.

WEBER-HYDRAULIK GmbH is aware of its responsibility within the supply chain and complies with all regulations required by REACH.

All products delivered to you by WEBER-HYDRAULIK GmbH are classified as "articles" according to the REACH regulation (Article 3, Definitions) and are thus not subject to compulsory registration. Under normal and reasonably foreseeable conditions of use, the products that we deliver do not release substances as defined in Article 7 of the REACH regulation, which is thus not relevant for us.

We guarantee that we will monitor the updates to the REACH requirements, in particular with regard to the additions to the Candidate List and the inclusion of new substances in the REACH annexes (Candidate List of Substances of Very High Concern for Authorisation, REACH Annex XIV), and will compare these with the information on substances.

To ensure a high level of product safety, we monitor the implementation of the REACH regulation on the part of our suppliers. In accordance with the notification duty defined in Article 33 of the REACH regulation, we have called upon them to inform us immediately if the article contains substances classified by the ECHA in the Candidate List as being of "very high concern" with a mass fraction above 0.1% now or in the future. As soon as we have received relevant information from the manufacturer with regard to this issue, we will forward it to you immediately without being asked.

Irrespective of the above, we will also inform you about relevant changes caused by REACH within the products, our ability to deliver them and the quality of the parts/products supplied to you within the scope of our business relationship, and in individual cases we will agree suitable measures with you.

Our statements refer exclusively to the current state of our knowledge and are based on information received from our suppliers. No guarantee or liability can be assumed for factors lying outside our knowledge and control.
