Ersteller/in: Informationssicherheitsbeauftragte Ruth-Maria Gerlach, Frank Bissinger

## 3 Information security of the provider

No.	Requirements	Information on implementation
3.1.	To what extent are information security guidelines and instructions in place?	
	-Incident	
	-Change	
	-Logs	
	-monitoring	
	-Cryptography	
3.2.	Has a CISO/ISB been appointed?	
3.3.	If a certified ISMS is operated (TISAX,	
	ISO 2700x)	
3.4.	Scope of the ISMS:	
	Are the solutions used by WEBER-	
	HYDRAULIK GMBH included in the	
	certified scope?	
3.5.	Evaluation of the SOA	
	(Statement of Applicability):	
	Which exclusions are defined?	
	Evidence (SOA attached?)	
3.6.	Are there any results from the last	
	surveillance/recertification audit	
	(evidence)?	
3.7.	Are certifications regarding cloud	
	security available (e.g. ISO	
	27017/27018)?	
3.8.	Is an information security risk	
	management system in place?	

## 4 Details of the solution (if applicable)

No.	Criterion	Information on implementation
4.1.	In which country is the solution hosted?	
4.2.	Is it possible for WEBER-HYDRAULIK	
	GMBH to exert influence on the	
	location of processing/processing?	
	Storage?	
4.3.	Is the hosting provided by the provider?	
	If no:	
	Who is a subcontractor?	

VERSION: 3 | 31.01.2024

	T	-		
	Is it certified (TISAX, ISO 2700x)?			
	What measures have been established			
	to monitor the subcontractor and how			
	are they followed up?			
4.4.	To what extent are there confidentiality			
	agreements/obligations valid under			
	contractual law?			
4.5.	If the contractor separates the data			
	from different clients (client separation)			
4.6.	Which authentication procedures does			
	the provider use (MFA where required)?			
4.7.	What technical and organizational			
	security measures does the provider			
	use for the solution?			
4.8.	To what extent is information security			
	ensured in exceptional situations			
	(BCM/BCP)?			
4.9.	Is regular data backup guaranteed?			
	cycles? Is the data backup encrypted?			
	Where are the backups stored?			
4.10.	To what extent is information protected			
	during transmission?			
4.11.	To what extent are event logs recorded			
	and analyzed?			
4.12.	Has a procedure for the return and			
	secure removal of information assets			
	been defined and implemented with			
4.42	the provider?			
4.13.	What audit measures does the provider			
	carry out regularly?			
4.14.	Does WEBER-HYDRAULIK GMBH have			
	the right to audit the provider?			

### 5 Applicable documents

This document is always valid in conjunction with the **guideline Information Security Requirements for Contractors.** If there are any deviations from our requirements from this guideline, you are obliged to report these to your contact person at WEBER-HYDRAULIK.

#### 6 Confirmation

By signing this form, the undersigned confirms on behalf of the contracting party that the information provided above is correct.
